PERSONAL PROJECTS

Microsoft Clone
- I designed website, crafted with love using the power of HTML, CSS, and the incredible Tailwind CSS framework.
- my goal was to create an website to improve my design and web development.

Face Recognition Using Raspberry Pi
- Raspberry pi is a small ,low-cost and single board computer.
- In this project we use open cv and python . first we get some images of user and after that with the use of web-camera we compare those images , if user face and images which we get both are same then door will be open.

E commerce Website
- In this project i just made clone of e commerce website using html ,CSS and JavaScript
